Electric fields (prac simulation)

PART A

Sketch the electric field patterns for the following using the pHET "Charges and fields" applet. (Click "Show E–Field. You may use thin arrows or lines in *your* sketched copies of fields.)

[Optional challenge: What does the "equipotential plot" indicate?]

PART B

Produce a graph of Electric field strength versus distance from a single charge. (Drag an orange dot to the workspace and click "show numbers", grid and tape measure.) Suggest an equation for E in terms of d.
